## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-18 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art search did not disclose a network element management system that determines which of a plurality of network elements is generating the greatest number of alarms and instructing such network element to stop transmitting the alarms. Further, the search did not disclose a network element management system which issues a signal to a network element to stop sending alarm signals based on a predetermined precedence of suspension of transmission.

### ***Citation of Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent number 5408218, Svedberg et al. discloses a model based alarm coordination system. Patent number 5388189, Kung discloses an alarm filter in an expert system for a communication network. Patent number 6212376, Hong discloses a method for inhibiting and allowing alarm handling in a digital cellular system.
